

EPDM Liner

Makes Treatment Installations Watertight

Zoeller Pump Company's EPDM liner is a very effective way to make in-ground treatment installations, such as recirculating media filters and constructed wetlands, watertight. Zoeller Pump Company provides custom sizes and the expertise to work with and service liners in the field. Accessory items such as pipe boots, splice kits, and repair kits are also available. Made from EPDM rubber, the 45 mil liners are stronger, more durable, and more chemically stable than their flexible PVC counterpart.

Features

- 45 mil EPDM rubber
- Dependable
- Long lasting
- Custom sizes available
- Accessory items such as pipe boots, splice kits, and repair kits are also available

Trusted. Tested. Tough.®
