Check Valves
Float Switches
Alarm Systems
Control Panels
Rail Systems

Trusted. Tested. Tough.
WHAT SETS ZOELLER SYSTEMS APART?

Since 1939, Zoeller Company has been manufacturing water pumps of many types. From pedestal pumps in the beginning to large HP submersible, non-clog pumps in recent years, we have gained invaluable manufacturing experience from our humble beginning in August Zoeller’s basement workshop.

Over the years, one of our most important mottos has been, ‘We excel at 1,000 little things’. From start to finish, we take pride in our products. When you have residential or commercial wastewater issues, you can count on Zoeller to deliver the very best solutions. Our commitment to unsurpassed quality offers years of service and durability with a responsive and knowledgeable product support team just a phone call away.

• SUPPORTING THE WHOLE PACKAGE...

In pumping systems, the “whole package” encompasses far more than just high quality pumps. The control, alarm, valves, disconnects, piping and container are all important components of a complete system. Zoeller understands that an installation is only as good as the weakest element, so we have gone to great lengths to provide accessory items that are as reliable as our legendary pumps. While we manufacture most of our products from start to finish, including check valves and rail systems, we recognize that producing certain specialized accessories requires a different skill set than our roots provide. In order to offer you the best components for your project, we have partnered with other specialized manufacturers, all of them leaders in their respective fields. You can be assured that the vein of Zoeller quality runs top to bottom throughout our entire product offering.

• QUALITY CONTROL AT ALL LEVELS...

You may have heard that all of Zoeller’s submersible pumps are 100% factory tested underwater prior to shipment. However, you may not be aware that before any new product is judged fit to carry a Zoeller label, we first subject it to a barrage of durability and performance tests. We pressurize check valves until they burst, cycle float switches until they give out, and crush basins until they collapse. These over-the-top abuses have very practical goals. They ensure that our products will withstand the rigors of your real world applications. We follow this testing with inspections of all materials that come through our doors in order to ensure the highest level of quality and consistency. At Zoeller, we realize that your projects are our projects and that your successes are our successes.

• FULL BREADTH OF PRODUCT LINE...

Zoeller is your ‘one stop shop’ when dealing with dewatering and wastewater systems. We offer everything from a small fractional sump pump to a large, 100 HP non-clog pump. From battery back-ups, check valves, sewage grinder systems, small prepackaged residential units or large prepackaged municipal systems, Zoeller can offer it all. Next time you are looking for a water or wastewater system, reach for the only catalog you will ever need... Zoeller Company!
**900 Series**

**Preassembled Sump Pump Systems**

**SPECIFICATIONS:**
- No assembly required! Drop it in the hole and go!
- Pump switch is installed 180° from inlet.
- Discharge pipe is plumbed with a predrilled 3/16” (5 mm) vent hole.
- Electrical cord seal is installed in cover.
- Cover is sealed and bolted down.
- Basin is filled with environmentally-safe peanuts for safe transit. Just add water and they dissolve!
- Automatic cast iron or thermoplastic pump with tank and all hardware.
- 18” x 22” (45.7 x 55.9 cm) basin with 4” inlet.
- Deluxe unit has a radon-approved basin and cover for radon prevention.
- Standard and economy models use a polyethylene basin and cover.
- Standard and economy covers have a 2” vent, 1-1/2” discharge.
- Deluxe cover has a 3” vent, 1-1/2” discharge.
- Fast, easy and job ready!

*See FM2124 for further information.*

**910 Systems**

**Unassembled Simplex and Duplex Sewage Package Systems**

Ideal for homes, farms, trailer courts, motels, restaurants and institutions where drain facilities are below existing sewer lines. Maximum temperature rated at 130 °F (54 °C).

**Duplex System for Indoor Sewage Applications (unassembled)**

**INCLUDES:**
- (2) automatic pumps (M264 or M267)
- (1) 10-0804 SmartPak® residential alternator with alarm
- (1) 31-1105 30” x 36” (76.2 x 91.4 cm) poly-foam basin with 2” vent/discharge
- (2) 30-0101 Tri-Check® valves

*See FM0454 for further information.*

915 Grinder Package

1/2 HP Grinder Package

The industry’s only 115 volt, 1/2 HP grinder pump stands up to the toughest applications where traditional sewage pumps fail. This job-ready system uses our innovative, stainless steel cutter, which requires little or no maintenance. The built-in scouring system and baffle keep debris from obstructing float operation. Small yet powerful, this efficient 7 amp pump handles most debris including: socks, denim, sanitary napkins, diapers, etc. The system is 100% preassembled for ease of installation.

*U.S Patent Nos. 9,004,38; 8,562,287*

*Other Patents Pending*

**APPLICATIONS:**
- Residential wastewater
- Light commercial
- 2” sewage ejection retro fits for most existing sewage basins

**SPECIFICATIONS:**
- 1-1/4” top discharge
- 1/2 HP, 115 V motor
- Cast iron motor housing with corrosion-resistant, powder-coated epoxy finish
- Includes high water indoor alarm and 1-1/4” “silent” check valve
- Available in 18” x 30” (46 x 76 cm) poly structural foam or 24” x 24” (61 x 61 cm) poly basin
- Stainless steel carriage directs inflow and reduces clogging
- Thermally-protected motor

See FM2795 for further information.

For complete product information, visit: zoellerpumps.com
1/2, 3/4, 1 HP Grinder Packages

The fractional HP grinder pumps are now available in package systems. This job-ready (non-suspended) system uses our innovative, stainless steel Tri-Slice® cutter, which requires little or no maintenance. The hardened stainless steel cutter is ideal for handling difficult solids such as wipes, rags, towels, etc. that can jam traditional style ejector pumps.

**APPLICATIONS:**
- Residential wastewater
- Light commercial

**SPECIFICATIONS:**
- 1-1/4" top discharge
- 803 - 1/2 HP, 805 - 3/4 HP, 807 - 1 HP
- Cast iron construction
- Oil filled for optimal heat dissipation
- Available in 18” x 30” (46 x 76 cm) polystructural foam or 24” x 24” (61 x 61 cm) poly basin. Consult factory for additional options.
- Thermally-protected motor

For complete product information, visit: zoellerpumps.com
912 Systems

Simplex Sewage Package Systems
(job ready/assembled)

SPECIFICATIONS:

- More choices, easier installation and fast delivery
- Saves labor and reduces installation errors
- 2” (50 mm) solids-handling pump
- 2” PVC discharge pipe, 30” (76 cm) long on 18” x 30” (46 x 76 cm), 24” (61 cm) long on 24” x 24” (61 x 61 cm) and 36” (91 cm) long on 24” x 36” (61 x 91 cm)
- Basins - polyethylene, poly-foam or fiberglass construction with poly or solid steel covers and 4” pipe seal hub, 4” PVC hub (deluxe) or 4” cast iron hub on L.A. Code Systems
- Check valve options - 30-0151, 30-0020, 30-0021, 30-0101 or 30-0103 (not included)
- Systems available with alarms and preinstalled alarm float.
- Premium indoor systems have a split cover for easy pump inspection, torque stops and an anti-floatation device
- Side discharge systems rated for outdoor burial: solid polyethylene structural foam lid and basin with 2” discharge on side
- 3/16” (5 mm) vent hole drilled

See FM2164 for further information.

24” X 24” Simplex Sewage System

See FM2810 for further information.

Sump & Sewage Basins

SPECIFICATIONS:

- Available in high-density polyethylene structural foam (PSF), polyethylene or fiberglass
- Ideal for residential, commercial and industrial applications
- Complete with necessary sealing hardware and flanges
- Available with 2” or 3” vent and 2” or 3” discharge
- Lid with gasket and 4” cast iron inlet hub with anti-corrosion coating are included with the sewage basins
- Centerline of hub is located 10-1/2” (26.7 cm) from top of basin (std.). Custom locations available
- Polyethylene sewage pump basins are IAPMO approved. For 10’ (3 m) stack test models, refer to charts on FM0487
- Sealed (radon) basins for sump pumps in 18” x 22” (45.7 x 55.9 cm) and 18” x 30” (45.7 x 76.2 cm) sizes
- Polyethylene sump basin available with plastic unsealed covers in 18” x 22” (45.7 x 55.9 cm)
- Sewage basins are watertight and gas-tight when properly installed
- Durable steel cover with gasket standard on simplex and duplex sewage basins
- One piece, seamless construction on all basins
- Duplex covers include two pump plates and inspection plate
- Ready to install for economical and simple installation
- Dimensional engineering data available
- Temperature rated 130 °F (54 °C)
- Fiberglass models available that will pass the 10’ (3 m) water stack test. (Refer to charts on FM0487) (L. A. - RR-5311)
- Various custom diameters and lengths available in fiberglass. Consult factory. Also with 10’ (3 m) water stack test

See FM0487 for further information and accessories.
QLS Series

Complete grinder package systems are factory assembled for quicker, easier installation at the jobsite. Zoeller’s Z-Rail® Technology with powder coated, ductile iron elbows and brackets provides longer life and reliability. Dual-rail system offers added support and stability while raising and lowering pumps compared to single-rail systems. A wide variety of basin diameters and depths are stocked to accommodate almost any job. Cover choices include solid fiberglass and either steel or aluminum hatches.

Z-Rail® System
Both the disconnect portion and the upper guide rail supports are made of domestic epoxy powder coated ductile iron, providing superior strength. Dual guide rails add stability, ensuring that the pump will not spin on the rail during installation or removal.

Basin
Zoeller Company stocks many different basin and cover options to fit a multitude of wastewater collection projects. Basin sizes from 24” x 48” to 48” x 120” meet most application needs. Customized packages available.

Basin Cover
Solid fiberglass, aluminum hatch, and steel hatch covers are stocked for QLS Series™ packages.

Three Way Ball Valve
The QLS Series™ systems utilize a 3-way ball valve in duplex configurations. The valve is positioned so that the service providers can easily isolate pumps without entering the basin.

Pipe Seal Hub
A 4” pipe seal is provided as a convenient field-installed inlet hub.

AFD
QLS Series™ basins come with an anti-floatation collar to resist bouyancy in high groundwater locations.

Flex-Boot Discharge Connection
A flexible, stable discharge seal remains watertight despite external pressures due to pipe settling.

Schedule 80 PVC Piping
Schedule 80 PVC discharge piping provides greater support and dependability with its thicker walls and higher pressure rating.
Valves: Check, Ball, & Plug

Full-Flow Unichecks

30-0152 / 30-0160
30-0163 / 30-0164
1-1/4” - 3” Cast Iron

SPECIFICATIONS:
- Vertical or horizontal installation
- Full-flow design, no restrictions
- Stops backflow of water
- Standard, 1-1/4”, 1-1/2”, 2”, 3” female NPT pipe
- Neoprene polyester, reinforced flapper, smooth edge design, with cast iron and non-corrosive metal backing plates and stainless steel fastener
- Corrosion-resistant, powder coated epoxy finish
- Rated at 50 PSI [115’ [35 m] of head] at 130 °F (54 °C)
- Stainless steel bolts
- Suitable for installation below basin cover

30-0021 / 30-0151
2” Plastic or Cast Iron Slip Union

SPECIFICATIONS:
- Full 2” flow design - meets BOCA (P.604.2) 2” full flow pump code
- Checks backflow of water
- Simple to install (no threading of pipe required): Save time and material costs
- Neoprene gasket and flapper, weighted with heavy stainless steel metal backing plates and rivet
- Vertical or horizontal installation
- Slips over ABS, PVC, steel or copper pipe
- Reduces motor and pump noise
- Flexible neoprene slip x slip union includes stainless steel clamps for low pressure systems. Avoid more than 10’ (3 m) static head above the check valve. 4.3 PSI at 130 °F (54 °C)
- Extra wide hinge to reduce stress
- Plastic check has PVC body and can be installed with solvent-welded couplings for pressure systems to 25 PSI, 57’ [17.4 m] of head (30-0023)
- Model 30-0151 has corrosion-resistant, powder coated epoxy finish
- Stainless steel sleeves available to meet Illinois Plumbing Code. (Cast Iron 30-0201 / PVC 30-0202)
- Meets requirements of Wisconsin Uniform Plumbing Code

Full-Flow Unichecks

30-0181 / 30-0200
1-1/4” - 1-1/2” Slip x Slip Union

SPECIFICATIONS:
- Flapper bends over a radius, no sharp 90° edges — lengthens life of flapper hinge
- PVC plastic check body, ultrasonically welded and can be solvent-welded for rigid, pressure-rated piping systems to 25 PSI, 57’ [17.4 m] of head) at 130 °F (54 °C) (30-0182)
- Vertical or horizontal installation
- Available in individual packages for pegboard display (30-0191)
- All stainless steel screws, nuts and clamps on model 30-0200 only
- Slip x slip for 4.3 PSI, 10’ (3 m) of head at 130 °F (54 °C). Avoid more than 10’ (3 m) static head above the check valve.
- Designed to reduce water hammer

30-0214 / 30-0215 / 30-0216
1-1/4” - 2” Cast Iron NPT High-Temperature

SPECIFICATIONS:
- Use with 2000 and 3000 series high-temperature pumps
- Vertical or horizontal installation
- Full-flow design, no restrictions
- Stops backflow of water
- Standard 1-1/4”, 1-1/2”, 2” female NPT pipe
- EPDM strand-reinforced flapper, smooth-edge design with cast iron and non-corrosive metal backing plates & stainless steel fastener
- Corrosion-resistant, powder coated epoxy finish
- Rated at 50 PSI [115’ [35 m] of head] at 200 °F (93 °C)
- Stainless steel bolts
Valves: Check, Ball, & Plug, continued

**Tri-Check**

30-0100 / 30-0101
1-1/2” - 2” PVC Check Valve/Ball Valve Union Combination

**SPECIFICATIONS:**
- Full-flow check valve design
- Threaded union allows pump to be removed without disrupting discharge piping
- Saves time and money - easy to install
- Neoprene gasket and flapper, weighted with stainless steel backing plates and rivet
- Can be installed on vertical or horizontal pipe
- Meets plumbing codes requiring a ball valve installed in conjunction with a check valve

**The Combo**

30-0102 / 30-0103
1-1/2” - 2” PVC Check Valve Union Combination

**SPECIFICATIONS:**
- All stainless steel screws
- Replaceable flapper in the check valve
- Extra wide hinge to reduce stress
- Rated for 25 psi, 57” (17.4 m) of head

**Quiet Check - PVC Solvent Weld with Union Check Valve**

**SPECIFICATIONS:**
- 1/2 lb. (0.23 kg) spring eliminates water hammer
- Reduces motor and pump noise
- Designed for both horizontal and vertical usage
- Full-flow, non-clog design installation
- Durable PVC check body and compression end fittings
- Solvent-weld ends allow for easy installation
- 30-0044 and 30-0045 have no unions
- No threading of pipe required - saves time and money
- Pressure rated at 50 PSI (115’ [35 m])

**QUIET CHECKS PVC SOLVENT WELD**

*Solvent weld only. No unions included (see chart).

**GENERAL CAUTION:** Water hammer creates momentary high pressure surges. These surges can cause severe damage to check valves and the piping system. Consideration for water hammer must be included in the piping system design. Reference ASPE Data Book, Chapter 2.33. May require check valves with special non-slam features or other engineered solutions.
Valves: Check, Ball, & Plug, continued

Compression 1-1/2” - 3” Compression Unichecks

SPECIFICATIONS:
- Heavy-duty ductile iron construction
- Angled seal for non-slam closure
- Non-clog design
- Reinforced disc
- Drip-tight seating
- Rated up to 250 PSIG
- Designed for both horizontal and vertical usage
- Optional back flow actuator and mechanical indicator

Switch-Mate Piggyback

Variable Level Float Switch

SPECIFICATIONS:
- Converts nonautomatic pump to automatic pump
- Simple installation
- Adjustable/variable level
- Standard 15’ (5 m) and 20’ (6 m) SJOW CPE cord with molded plug. 10-0055 and 10-0065 - 10’ (3 m) cord standard
- Float is constructed of durable PVC/polypropylene
- Standard - normally open (NO) (“pumps down”)
- Optional - normally closed (NC) (“pumps up”). Consult factory
- Maximum operating temperature for 10-0748: 120 °F (49 °C). All other switches: 140 °F (60 °C)
- Float is omnidirectional
- Includes mounting clamp
- Designed for EFFLUENT, SEWAGE and DEWATERING applications
- Variable level float switch, for use in 18” (45.7 cm) minimum diameter basins
- 10-0748 - 25’ (8 m) cord standard, no molded plug. Can be used as a control switch to operate an external magnetic or combination starter on three phase pumps
- Vertical piggyback float switch. Ideal for narrow diameter basins. 6.5” (16.5 cm) maximum cycle range
- Use recommendation chart for switch selection

Variable Level Control Switches

APPLICATIONS:
- Simplex or duplex pump control and high level alarm on electrical alternating control panel systems
- For dewatering, effluent and sewage applications
- Switch for APak®

SPECIFICATIONS:
- Float is constructed of durable PVC/polypropylene
- Standard mechanical variable level control switches are rated for 115/230 V, 5 Amps
- Low-current, mechanical variable level control switches are rated for 125 VAC/30 VDC, 0.1 Amps
- 18/2 Type SJOW CPE cord standard
- Cords are available in 15-25-35-50' (5-8-11-15 m) lengths
- Temperature rating of 140 °F (60 °C)
- Approximately 1.5" (38 mm) liquid level differential in switching action

ADJUSTABLE WEIGHT: (P/N 10-0689) provides an accurate pivot point for suspended float switches.
- Gripping teeth on clip and weight channel securely lock float cable into place
- Cable weight can be adjusted without the use of tools

HOUSING: 1lb 12oz. (0.8 kg), 2.8” x 3.3” (7.1 x 8.4 cm), impact-resistant and non-corrodible, PVC housing for liquids up to 140 °F (60 °C)

CLIP: injection-molded acetal plastic

WIRE/CABLE ACCOMODATED: SJOW, SJTW, 18/2, 18/3, 16/3, 14/2, 14/3

SHIPPED WEIGHT: 2 lbs. (0.9 kg)

* Not for use with intrinsically-safe control systems.
** For use with intrinsically-safe control systems only.

Products may not be exactly as pictured.
**SmartPak® Plus**

**10-0804 Residential Alternator System**

**SPECIFICATIONS:**
- Alternates two automatic pumps up to 1/2 HP, 12 amps each, 115 V, single phase (not to be used with model 63 or model 95 pump, or with any model grinder pump)
- Extends pump life
- Compact design easily mounts in confined spaces
- Circuit fault protection
- Specially designed for humid areas
- Universal connection for alarm switch replacement
- Auxiliary output contacts (normally open) for remote alarm connection
- Solid green LED lights for Pump 1, Pump 2 and Power
- Flashing red LED lights for alarm conditions
- 9’ (2.7 m) power cord
- Multiple alarm modes will alert user to potential problems and protect property by switching to the other pump when necessary

Alarms include:
  - High water
  - Loss of power
  - Continuous pump run
  - Breaker tripped
  - Pump failure
- Button for Silence and Reset
- Built-in, rechargeable battery will operate the alarm and LED lights for a limited time during power outage

*Note: Not to be used with model 63 or model 95 pump, or with any model grinder pump.*

---

**Z Control® Gateway**

**10-4144**

**SPECIFICATIONS:**
- Using the Gateway’s input terminals, get email, text and push notifications from any device with auxiliary outputs
- Utilizes your free account on the Z Control® Cloud
- When used with the Z Control® Enabled products that require the Gateway, additional features such as remote control and monitoring are included
- Power adapter included
- Connects to existing router using either Wi-Fi® or ethernet

**Real Time Peace of Mind™**

- [Download on the App Store](https://apps.apple.com/us/app/z-control-gateway/id1586428561)
Qwik-Box
Pump Control and Alarm

The Qwik-Box is a junction box designed for easy hookup of pumps and alarm systems. It is used in septic effluent, sewage, or dewatering applications, and requires a connection outside the building or residence. The Qwik-Box eliminates the need for junction wiring boxes inside sewage and septic tanks, and consists of UL listed components.

SPECIFICATIONS:
- No need to cut off plugs
- Sealed watertight enclosure
- Available in 115 Volt or 230 Volt design
- Corrosion-resistant PVC construction
- Easy hookup of indoor alarm with terminal strip exposed for low voltage wiring
- Rated for NEMA 4X
- Water-tight rubber cord seal for pump and switch cables
- Optional indoor tank alert alarm with silence switch and LED indicator
- Installation and wiring instructions included
- Meets NEC requirements for a disconnect

See FM1420 for further information.

10-2616 Auto-Dialer System

The Auto-Dialer is a single channel voice dialer that can be used with any device that can provide a normally open / closed contact. It can be programmed to store up to four contact numbers, including standard (voice) telephones, most cell phones, and pagers. It will provide a 16 second pre-recorded message.

SPECIFICATIONS:
- Voice-Chip technology (NO TAPES)
- Record your own personal messages
- Dials each contact number up to four times
- Internal 9V battery backup (battery NOT included)
- Tone or pulse dial only (NOT intended for digital phone lines)

Products may not be exactly as pictured.

Flood Alert®
10-0763
High Water Alarm

SPECIFICATIONS:
- Operates on (3) AAA batteries
- Low battery alarm
- Warns you when sensor contacts water
- Loud intermittent horn rated at 103 +/- 3 db at 1’ (30 cm)
- On/Off silence switch
- Stainless steel sensor contacts
- Easy to install, portable and safe!
- Compact design (3-1/4” x 2-1/4” [8.3 x 5.7 cm])
- No adjustments needed
- Solid state electronic components
- 5’ (1.5 m) of lead wire
- 12-month limited warranty
- AC power adapter capability. Requires Class 2 transformer, Input: 120 VAC/60 Hz, output: 4.5 VDC/150 mA, tip positive, type B plug. (Not included, but available at most electronics stores)

Flexible sensor wire allows this alert to be used in many applications. Alerts you of overflowing:
- Sump pump  •  Toilets  •  Broken pipes
- Dishwashers or washing machines  •  Laundry sinks
- Air conditioning pans  •  Bath tubs or hot tubs

Products may not be exactly as pictured.
APak® Alarm Systems

The all new APak® alarm is more compact and easier to install. It is CSA approved in a NEMA 1 enclosure. Battery life is over 1 year from 2 AA batteries. Alarm may be used as AC only, DC only, or AC/DC applications. The APak® alarm system sounds a horn when a potentially threatening liquid level condition occurs. The horn can be silenced, but the alarm light remains on until the condition is remedied.

A green “POWER ON” light indicates 120 V primary power to the alarm. A low battery chirp feature indicates when the battery should be replaced. A red “ALARM” light indicates a high-level condition.

NOTE: It is always recommended to power the alarm from a separate circuit than the pump to avoid losing power to both during a tripped breaker scenario.

### 10-4012

**SPECIFICATIONS:**
- NEMA 1 enclosure (INDOOR USE ONLY)
- Automatic alarm reset
- Horn is rated 87 decibels at 10’ (3 m)
- 2 AA battery backup (battery not included)
- 15’ (5 m) alarm (12 V) tethered switch
- 6’ (2 m) power cord
- Auxiliary dry contacts (use 10-4014)

### 10-4011

**SPECIFICATIONS:**
Same standard features of our 10-4012 with:
- 15’ (5 m) alarm reed switch
- Auxiliary dry contacts (use 10-4013)

### 10-0623 Indoor/Outdoor

**SPECIFICATIONS:**
- NEMA 3R enclosure (6.5” x 4.5” x 3”)
- Top-mounted alarm beacon
- Automatic alarm reset, horn silence switch and alarm test switch
- Horn is rated 85 decibels at 10’ (3 m)
- Pre-mounted terminal block with connections for pump and float switch
- 15’ (5 m) alarm (12 V) tethered switch
- Power connections are field-wired

**NOTE:** All variable level float switches in this section are mechanically activated and do not contain mercury.

### 10-0682 Deluxe

**SPECIFICATIONS:**
Same standard features of our 10-0623 with:
- 20’ (6 m) alarm (12 V) tethered switch
- 6’ (2 m), 115 V power cord with water-tight cord connectors

### Z Control® Enabled Models 10-4013 and 10-4014

**SPECIFICATIONS:**
- 10-4013 comes with reed sensor
- 10-4014 comes with mechanical float switch
- All the standard features plus:
  - 2nd input for additional monitoring ability
  - Dry contacts for connection to home security system, etc.
  - Z Control Enabled
    - Wi-Fi® equipped
    - Receive free text, email, and push alerts on:
      - Power outage
      - Low battery
      - Input 1 or 2 triggers
      - Loss of contact with Z Control®
      - Remotely silence, reset alarm.
      - Free Z Control App and Web interfaces
      - Free Z Control account
      - No monthly cost
      - Simple setup
      - Z Control connectivity LED

### 10-0126 Indoor/Outdoor

**SPECIFICATIONS:**
Same standard features of our 10-0623 with:
- NEMA 4X thermoplastic enclosure (6” x 4” x 3”)
  (15.2 x 10.2 x 7.6 cm)
- Horn is rated 88 decibels at 10’ (3 m)
- 5A auxiliary dry contacts

For Duplex Installations

An electrical alternator is used on a duplex pump application where automatic alternation of the pumps is desired for added protection in residential or commercial applications. With one pump operating to handle normal flow, a second pump becomes operational in the event the water level continues to rise. The built-in alarm system, a standard feature, can be connected to sound either when the second pump becomes operational with a 3-float switch system or independently with a 4-float switch system. All electrical systems must be installed by a qualified electrician and according to the National Electrical Code. (see Section 430-71 through 430-113, plus any others that apply).

SPECIFICATIONS:

- Hand-off-auto toggle switch for each pump
- Green pump run pilot light for each pump
- Alarm test and silence switches
- Red pilot light (NEMA1 only) and audible alarm with 83 to 85 decibel rating for a high-water condition
- Red alarm beacon included with NEMA 4x enclosure
- Auxiliary dry contact
- High water alarm
- Single phase - circuit breaker for each pump
- Three phase - motor protective switch with overload protection
- Magnetic starter for each pump
- Alternating mechanism
- Numbered terminal strip for connecting pumps and variable level float switches
- NEMA 1 - general purpose or NEMA 4x - watertight enclosures available
- Integral auxiliary terminal board connections (dry contact) for remote alarm devices
- 3 or 4 variable level float switch control operation
- Three 20’ (6 m) float switches included with single phase panels
- Off-the-shelf components provide easy field maintenance and repair
- Float switches not included with three phase panels
**ACCESSORIES AND CONTROLS**

**NOTE:** 600 and X600 Series single phase pumps require special panels that include start components. See Selection Guide FM1228 and FM1705 for correct panel selection.

© All rights reserved. ZOELLER PUMP CO. | 502-778-2731 | 800-928-7867 | zoellerpumps.com
An electrical control panel is used on a simplex pump application where automatic electrical cycling of the pump is desired for added protection in residential or commercial applications. A control panel is required for all systems using a nonautomatic pump. The built-in alarm system, a standard feature, will activate when the water level becomes unusually high. All electrical systems must be installed by a qualified electrician and according to the National Electrical Code (see Section 430-71 though 430-113, plus any others that apply).

**Single Phase Control Panel**

**SPECIFICATIONS:**
- 115- 200- 230 Volts
- Dead front panel
- Complete with (3) 20’ (6 m) control float switches
- Clear inner door (10-0125 only)
- Equipment disconnect (10-0125 only)
- Motor contactor (all models except 10-1019 and 10-1023)
- NEMA 4X watertight enclosure with lockable latch
- Top-mounted alarm light
- Alarm horn provides audio warning of alarm condition (83 to 85 decibel rating)
- Pump run indicator light
- Horn silence and alarm test toggle switches
- HOA switch
- Dry auxiliary contact (not available in plug-in panels)

**Plug-in Control Panel**

**Single Phase**

**SPECIFICATIONS:**
- 115V (10-1019) or 230V (10-1023)
- NEMA 4X enclosure with hinged cover
- Corded plug for use with piggyback pump switch
- Alarm horn (83 to 85 decibel rating)
- Terminal strip
- Horn silence switch to turn alarm on or off
- Alarm float only

**Three Phase**

**SPECIFICATIONS:**
- 200-230-460-575 Volts
- NEMA 4X - watertight enclosure with lockable latch
- Hand-off-auto toggle switch
- Green pump run light
- Alarm test & silence switches
- Red alarm beacon and audible alarm for a high water condition (83 to 85 decibel rating)
- Motor protection switch with overload protection
- Magnetic starter
- Numbered terminal strip for connecting pumps and variable level float switches
- Dry auxiliary contacts for remote alarm devices
- Three float operation (floats not included - see FM0526)
- Off-the-shelf components provide easy field maintenance and repair

Control Panels for Explosion Proof Pumps

Simplex and Duplex with Intrinsically-Safe Relays

These intrinsically-safe control panels are used on pump applications defined as a hazardous duty location. Lift stations in some regions fall under this classification. The intrinsically-safe panel, in conjunction with an explosion-proof pump, will provide a system that will not allow ignition of explosive gases. The purpose of the control panel is to cycle a pump automatically. Each panel comes standard with pump run light(s), a high water audible and visual alarm, seal fail indicator(s), and a UL Listing. All panels come standard with a NEMA 4X rating for indoor or outdoor use.

These panels MUST NOT be in the space classified as needing explosion-proof equipment. Special fittings that either prevent the passage of hot gases, in the case of an explosion in a Class I area, or the passage of combustible dust, fibers, or flyings in a Class II or III area (NEC 501-5 and 502-5) are required. A qualified electrician must install all electrical systems. National Electrical Code (NEC) Articles 500 through 503 explain in detail the requirements for the installation of wiring or electrical equipment in hazardous locations. These articles, along with other applicable regulations, local governing inspection authorities, insurance representatives, and qualified engineering/technical assistance, should be your guides to the installation of wiring or electrical equipment in any hazardous or potentially hazardous location.

SPECIFICATIONS:

- Intrinsically-safe relays
- NEMA 4X enclosure
- Top-mounted alarm light
- Hands-off-auto toggle switch for each pump
- UL Listed
- Alarm horn with silence switch
- Magnetic motor contactor
- Lockable Latch
- Auxiliary dry contact/high water alarm
- Circuit breaker pump disconnect
- 3 or 4 variable float switch control operation
- Off-the-shelf components provide for relatively easy field maintenance and repair
- Green pump run pilot light for each pump
- Seal fail indicator light(s)
- Thermal cutouts for 3 phase
- Duplex only - lead/lag alternating circuit

Economy Junction Box (Field Assembled)

PVC plastic box with removable cover for use in sewage, effluent, dewatering, or corrosive environments. Box is 4” x 4” x 2” (10 x 10 x 5 cm) and is field-drilled for maximum flexibility in each installation.

SPECIFICATIONS:
- 10-0770-Box includes 2 UF cord seals for 12 or 14 gage UF cable and 3 round cord seals for 16-3, 16-2, 18-3, or 18-2 SO type cords
- 10-0776-Box includes one 3/4” PVC conduit adapter and 3 round cord seals for 16-3, 16-2, 18-3, 18-2 SO type cords
- 10-0777-Box includes one 3/4” PVC conduit adapter and 4 round cords seals for 16-3, 16-2, 18-3, 18-2 SO type cords
- 10-0778-Box includes one 3/4” PVC conduit adapter and 5 round cord seals for 16-3, 16-2, 18-3, 18-2 SO type cords

Sewage/Waste Junction Boxes

NEMA-4X Junction Boxes are electrical enclosures that are watertight, dust-tight, and corrosion resistant. Boxes are completely assembled with cord seals and terminal strip for easy field wiring.

Starter Kits

A starter kit is required for all single phase model 611, 621, 631, 641, and 651 pumps. A starter kit consists of the single phase capacitors and relay required to run the pump. These components are shipped loose and are installed into the pump’s control panel.

Note: Small cord grips are for 16 ga. and 18 ga. cable.
Large cord grips are for 12 ga. 4 conductor cable and 14 ga. 4 conductor cable.
**Connect & Rail Systems**

**Z-Rail® Threaded Rail Systems**

1-1/4” - 3” NPT Discharge Pumps

**SPECIFICATIONS:**
- Sewage, storm water, effluent and grinder pump systems
- For use in concrete, steel, or fiberglass tanks
- Allows for removal of pumps from ground level
- No confined space entry to service pump
- No pull rods or hold down rods
- Disconnect fitting with positive machine fit and o-ring provides a reliable seal
- Seals up to 370’ TDH (160 psi) and supports a weight up to 300 lbs
- Guide rails direct the pump to and from the disconnect fitting. Systems are supplied complete with disconnect fitting, guide plate, rail guide, and upper rail support bracket
- All systems use 3/4” schedule 40 pipe rails (not included)

**3” & 4” Flanged Rail Systems**

Horizontal Discharge

**SPECIFICATIONS:**
- For 600 and X600 Series solids-handling pumps
- For basins of any depth
- Cast iron construction with stainless steel hardware
- Easy engagement and disengagement of pump from ground level
- Suitable for most horizontal discharge pumps having a 3” or 4” ANSI flange
- Seals up to 100’ TDH (43.9 psi) and supports a weight up to 500 lbs
- Includes base elbow, pump adaptor plate, sealing gasket, rail guide and upper rail support
- All systems use 2” schedule 40 rail pipes (not included)

**Disconnect Only**

1-1/4” - 2” Discharge

**SPECIFICATIONS:**
- Economical, reduces time and cost of removing pump
- Safety: keeps personnel out of pits & out of contact with contaminants
- Used for shallow systems where guide rails are not necessary (pull rod not included)
Founded in 1939, Zoeller Company is one of the oldest independently-owned professional pump manufacturers in North America. Headquartered in Louisville, Kentucky USA, Zoeller has over 800 employees worldwide and close to 600,000 sq. ft. of manufacturing facilities from our seven operations in North America and Asia.

Zoeller Company has established itself as an innovative leader in pumping equipment and water treatment systems by continuous research and development. The quality of our products is demonstrated by UL, CSA, CE, and NSF listings as well as continued growth throughout the United States, Canada, Mexico, and over 40 other countries around the globe. The company has also expanded to include five brands, which have become the foundation of Zoeller.

The original Zoeller product line now resides in Zoeller Pump Company, which offers a broad range of submersible pumps from fractional to 7-1/2 HP for residential and commercial sump, effluent, dewatering and grinding applications.

Flint & Walling, founded in 1866 in Kendallville, Indiana USA, is the only pump company in the U.S. to manufacture its own motor for jet and centrifugal pumps. This product line specializes in deep well pumps that range from 5 GPM to 1,000 GPM, as well as centrifugal, jet, booster, and submersible pumps up to 7-1/2 HP.

Founded in 1952, Wolf Pump is a manufacturer of submersible turbine pumps located in Abernathy, Texas. Wolf currently produces 4" to 8" pumps with capacities ranging from 35 to 1000 GPM. These pumps are known for their efficiency and durability in demanding water applications including irrigation, municipal water supplies, dewatering applications, dairy production, mining, the oil and gas industries, aquaculture, and more.

Zoeller Engineered Products provides products for storm water removal, sewage pumping stations and hazardous environment applications for residential, commercial and municipal markets. Available from 1/2 BHP to 100 BHP, each pump is customized by design, manufacture and installation according to exact application needs.

Clarus Environmental offers sustainable environmental products, solutions, and services for the collection, treatment, and dispersal of residential and community wastewater. This line specializes in onsite pumps, pressure sewers, biological and mechanical treatment processes, disinfection, and discharge of safe water.
