A Zoellersimplex control panel shall be furnished to	steel or copper piping. Unicheck shall have valve body and

seat of PVC plastic and shall be assembled with thru bolts. Gasket and flapper shall be neoprene with brass backing plates and stainless steel rivet. Unicheck shall include two (2) neoprene unions and four (4) stainless steel clamps and fasteners. 30-0021 (Clamp Union Valve) (2 inch) full flow check valve, rated at 4.3 psi (10 feet TDH) at 130 °F shall be furnished to fit 2 inch ABS, PVC, CPVC, steel or copper piping. Unicheck shall have valve body and seat of PVC plastic and shall be assembled with thru bolts. Gasket and flapper shall be neoprene with brass backing plates and stainless steel rivet. Unicheck shall include two (2) neoprene unions and four (4) stainless steel clamps and fasteners. 30-0015 (Compression Union Valve) 1-1/2 inch IPS full flow check valve shall be furnished to fit 1-1/2 inch IPS pipe. Unicheck body and compression and fittings shall be constructed of PVC. Flapper and end seals shall be Buna-N. Valve shall include no metallic parts. Pressure rated at 25 PSI (57 feet TDH) at 130 °F. 30-0152 (2 inch) cast iron full flow check valve with 2 inch female NPT Rated at 50 PSI (115 feet TDH) at 130 °F. Neoprene polyester reinforced flapper with cast iron and brass backing plates and stainless steel fastener. 30-0160 (3 inch) cast iron full flow check valve with 3 inch female NPT Rated at 50 PSI (115 feet TDH) at 130 °F. Neoprene polyester reinforced flapper with cast iron and brass backing plates and stainless steel fastener. OPTIONAL ALARM SYSTEM An audible high water alarm system shall include a Zoeller 10-0015 (115 V) or 10-0016 (230 V) APak® and a 10-0225 float switch. The APak® shall include a six (6) inch steel alarm bell, which shall sound sixty-eight (68) decibels at a distance of ten (10) feet and a dual mount transformer, which shall step down 115 V or 230 V 1 Ph line voltage to 8 V. The 10-0225 float switch shall be constructed of plastic and shall be omnidirectional. Float shall include SJOWA cord and shall be fastened to discharge pipe with plastic tie mounting strap. 10-4012 (115 V/1 Ph) APak® complete with tethered float

10-0015 (115 V) or ______ 10-0016 (230 V) APak® and a 10-0225 float switch. The APak® shall include a six (6) inch steel alarm bell, which shall sound sixty-eight (68) decibels at a distance of ten (10) feet and a dual mount transformer, which shall step down 115 V or 230 V 1 Ph line voltage to 8 V. The 10-0225 float switch shall be constructed of plastic and shall be omnidirectional. Float shall include SJOWA cord and shall be fastened to discharge pipe with plastic tie mounting strap.

10-4012 (115 V/1 Ph) APak® complete with tethered float and NEMA 1 enclosure. Warning light and horn, which can be manually turned off. cCSAus certified on complete alarm system.

10-0126 (115 V/1 Ph) High level alarm complete with NEMA 4X enclosure, alarm bell, alarm light, silence switch, and sensor float switch with 15' cord. Entire unit is UL listed and CSA certified.

10-0623 (115 V/1 Ph) High Level Alarm rated for indoor/outdoor use per UL 864. The alarm will include an alarm horn, alarm light, silence and test buttons, and a float switch.

10-0682 (115 V/1 Ph) deluxe high level alarm rated for indoor/outdoor use per UL 864. The alarm will include an alarm horn, alarm light, silence and test buttons, a float switch, power cord, and watertight connectors.

SUMP BASIN

A Zoeller _____ polyethylene basin, .200 inch thick, .949 G/CC dense, or Zoeller _____ fiberglass basin, 3/16 inch thick, .058 pounds/cubic feet dense, ____ inches inside diameter by ____ inches deep shall be furnished. The basin shall include ____ four

(4) inch cast iron caulk inlet hubs with anticorrosion coating, combo hub or pipe seal. The centerline of the hub(s) shall be located nine (9) inches from the top of the basin. The basin shall also include a .115 inch thick steel sump cover. An optional pump installation plate can be provided on covers twenty four (24) inches in diameter or larger. Optional anti-flotation ring can also be provided. Also included shall be a neoprene seal for pump cord, neoprene seal for vent and discharge flange, foam cover seal and plated steel fasteners. Cover shall include a _____ inch vent a _____ inch discharge flange with mounting hardware.

PIPING & POWER WIRING

All piping shall be rigid and permanent in nature and shall be furnished and installed by the contractor. A unicheck valve shall be installed in the discharge pipe. A 3/16 inch vent hole shall be drilled in the discharge pipe below the check valve and pit cover to purge the system of trapped air. Power wiring shall be supplied by electrical contractor. Power wiring for pumping system and alarm system shall be connected to separate circuits.

EXTRA DUTY

Where conditions require, specify extra duty for adverse conditions.

HIGH TEMPERATURE PUMPS

For applications up to 200 °F continuous operation, specify High Temperature Zoeller Pump Co. models. See literature on High Temperature pumps, FM2811, FM1923 and FM0807, for additional information.

Where conditions, due to safety, health and the economy of

PUMP DISCONNECTS AND RAIL SYSTEMS

	•
	nance require pump disconnects or rail systems specify:
;	39-0001, 1-1/2" NPT Disconnect (Non-pump Supporting)
	39-0002, 2" Disconnect (Non-pump Supporting)

;	39-0122, 3" x 3" Z-Rail Disconnect System, all Ductile Iron
(Construction
;	39-0123, 3" x 3" Z-Rail Disconnect System, Ductile Iron
(Construction w/ SS Upper Rail Bracket

The Z-Rail Disconnect System is a pump support assembly consisting of a disconnect fitting, rail plate & guide and utilizes two 3/4" rail pipes that guide the pump into and out of the basin. The assembly components are made of ductile iron with an optional 304 SS upper rail support bracket. Used in concrete, steel or fiberglass basins, it allows for the installation or removal of the pump from the basin at ground level without entering the basin. The disconnect fitting has a machined fit with an O-ring seal that holds up to 160 psi, being able to support pumps weighing up to 300 lbs. The 3/4" rail pipes are provided by the installer, being either galvanized steel or SS pipe.
