Indoor/outdoor alarm system to warn of a high water condition

91104-0001

## Alarm Systems & Control Switches

zoellerpumps.com | 800-928-7867 | 3649 Cane Run Rd., Louisville, KY 40211

Zoeller Pump Company's liquid level alarm systems are useful in pump chambers, dose tanks, sump pump basins, holding tanks, lift stations, and other non-potable water applications. The alarm boxes are equipped with an audible and visual indicator to warn the user of a high water condition. When a potentially high-water condition occurs, a control float switch activates the alarm system, the horn sounds, and the red beacon illuminates. All alarm boxes include test and silence functions. The NEMA rated enclosures are rated for outdoor use and are designed for ease of installation. Variable level control switches of varying lengths are also available allowing you to select a control switch of the desired length.

## Features

- NEMA rated enclosures, UL Listed
- Rated for indoor or outdoor use
- Audible and visual alarm indicators
- Exterior alarm Test/Normal/Silence switch
